Application No. 10/525,309

AMENDMENTS TO THE CLAIMS

A detailed listing of all claims that are, or were, in the present application, irrespective of whether the claim(s) remains under examination in the application are presented below. The claims are presented in ascending order and each includes one status identifier.

1-8. (Canceled).

9. (Previously Presented) An assembly comprising: a biomedical electrode, a cable, and a resilient snap-on fastening means to fasten said electrode to said cable, said fastening means comprising a male element and a female element, said female element having a cavity adapted to surround said male element, wherein the male element has an orifice and the female element has a protuberance, the protuberance being shaped so as to be housed in said orifice.

10. (Previously Presented) The assembly as claimed in claim 9, wherein the male element is fastened to the electrode and the female element is fastened to the cable.

11. (Previously Presented) The assembly as claimed in claim 9, wherein the male element comprises a first portion of substantially frustoconical shape, located on a side facing the female element, which first portion is placed on a second portion of substantially frustoconical shape, which is a reverse of that of the first portion.

12. (Previously Presented) The assembly as claimed in claim 11, wherein, relative to a principal vertical axis of the male element, an angle made by a side wall of the first portion is

Application No. 10/525,309

less than an angle made by a side wall of the second portion.

13. (Previously Presented) The assembly as claimed in claim 12, wherein the angle made by the side wall of the first portion lies between  $5^{\circ}$  and  $15^{\circ}$  and the angle made by the side wall of the second portion lies between  $30^{\circ}$  and  $50^{\circ}$ .

14. (Previously Presented) The assembly as claimed in claim 13, wherein the angle made by the side wall of the first portion is approximately equal to  $8^{\circ}$  and the angle made by the side wall of the second portion is approximately equal to  $40^{\circ}$ .

15-22. (Canceled).
